

Power Services Customer Training

ONLINE COURSES

Knowledge is Power

To successfully operate and maintain your plant, you need a well-trained workforce. Online e-learning courses from GE provide you a flexible method to train your staff.

Self-paced learning for a broad audience, anytime and anywhere

GE's Power Services Customer Training Online courses offer flexible learning solutions to help you easily and cost-effectively train your personnel, anytime and anywhere. These courses are a great choice for plant personnel who would like supplemental training or a foundation for our Site-Specific and/or Open Enrollment courses. Online courses cover a variety of topics and are applicable to a broad range of personnel, including plant operators, maintenance engineers, supervisors, and plant business administration.

Developed by OEM experts, our Online courses provide guidance and instruction for both new and installed base equipment. Your employees can access courses from any convenient location, at any time. Online access to e-learning modules allows employees to control the pace of each course and retrain on concepts as necessary.

Course Content	Key Features
<p>Our 25 Online self-paced learning courses offer training across a variety of power plant equipment:</p> <ul style="list-style-type: none"> • Total Plant Solutions • Aeroderivative Gas Turbines • Heavy Duty Gas Turbines • Steam Turbines • Generators 	<ul style="list-style-type: none"> • Short courses accessible anytime, anywhere • Technology-specific standard content, in English • Student progress that can be monitored by a manager • Printable completion certificate available at the end of each course

Online training benefits

- **Self-Paced.** Each individual controls the pace of the course, and can spend as little or as much time as desired during each e-learning module.
- **Cost-Effective.** Ideal for a broad range of staff members who require supplemental learning, our online courses deliver an effective training experience at an affordable cost. With online training, travel expenses are eliminated.
- **Convenient and Flexible.** Online training means employees can learn from a comfortable, convenient location at times that don't conflict with other important or time-sensitive responsibilities. These courses are a good fit for employees with busy schedules, and a tight time frame.
- **Prompt Feedback.** Created by OEM experts, our online courses track student progress and include assessments that allow students to earn a course completion certificate.

Meeting your continuous learning needs

A continuous path of learning helps plant personnel gain the knowledge and skills needed to run an efficient, successful plant. In addition to online learning, we can suggest the right mix of additional training options to align with your plant configuration, equipment technology, employee audience, and time constraints.

- **Site-Specific Courses.** Our high value training service offers a variety of 200 site-specific courses that are prepared by your assigned GE instructor and dedicated project manager. They are delivered either at your site or at one of our Power Services global learning centers in the language of your choice, and on a schedule that works for you. Courses may contain a mix of classroom learning, site walkdowns, and hands-on training.

- **Open Enrollment Courses.** With technology-specific content, our Open Enrollment training offers a comprehensive selection of more than 75 English language courses for small staff or new team member training, or to expand the skills of select employees. Your employees train at one of our Power Services learning centers with students from around the world. Courses offer a mix of classroom learning techniques, and may contain walkdowns and/or hands-on training.
- **Online Courses.** A cost-effective solution for a broad range of employees, our 25-plus Online English language courses let you train your personnel anytime, anywhere, and at their own pace. Each course ranges in duration from one to several hours, and can be started and stopped at the student's discretion.
- **Multi-Year Training Agreements.** Our long-term flexible training agreement is our highest value offering, which allows you to simplify your budgeting and planning efforts. This agreement entitles you to a fixed number of annual training days for GE's Site-Specific and/or Open Enrollment courses, unlimited use of all our available Online courses, plus exclusive access to our Remote Turbine Operations Simulator. We work with you throughout your plant's lifecycle to help you select the training solutions that best meet your evolving needs.
